About APX10™

APX10 brings superior infrastructure overview and pipeline reinvestment decision guidance to water and wastewater utilities. Taking asset management decision-making to the next level.

APX10 ensures utility management translate critical information into actionable insights for decision-makers aiming to expand efficiency, investment performance, reputation, and critical infrastructure services.

Fast
No expensive implementation project.

Effortless
Minimum of utility involvement needed.

Existing data
We are data agnostic - and partner up with all vendors.

Proven solution for the Digital Utility

- 20% market share in an advanced Nordic market with mid-sized utilities.

- Asset Performance Management made easy with affordable innovation, rapid integration, and continuous development.

- Recognized domain experts in water utility-focused software.

- Unmatched industry use-cases for reinvestment planning in budget-capped and strict regulatory environments.

> *We see the effect in OPEX and CAPEX savings of min. 10-15% annually.*
> Benny Nielsen, Head of Planning, Herning Vand

> *We can more easily prioritize our tasks, to achieve the greatest possible environmental improvement in the shortest span of time.*
> Jesper Mau Kristiansen, Head of Department, Hedensted Spildevand

> *data|APX® has given us the overview we didn't have before.*
> Klaus Hvass Kjeldgaard, Asset Manager, Fors
